

User End Goal

As a music lover, I want to be able to discover songs by searching through a simple database, so that I can discover new music to listen to.

User Stories

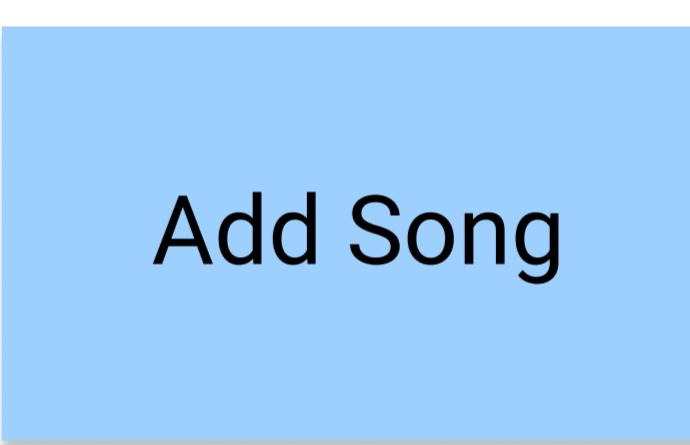

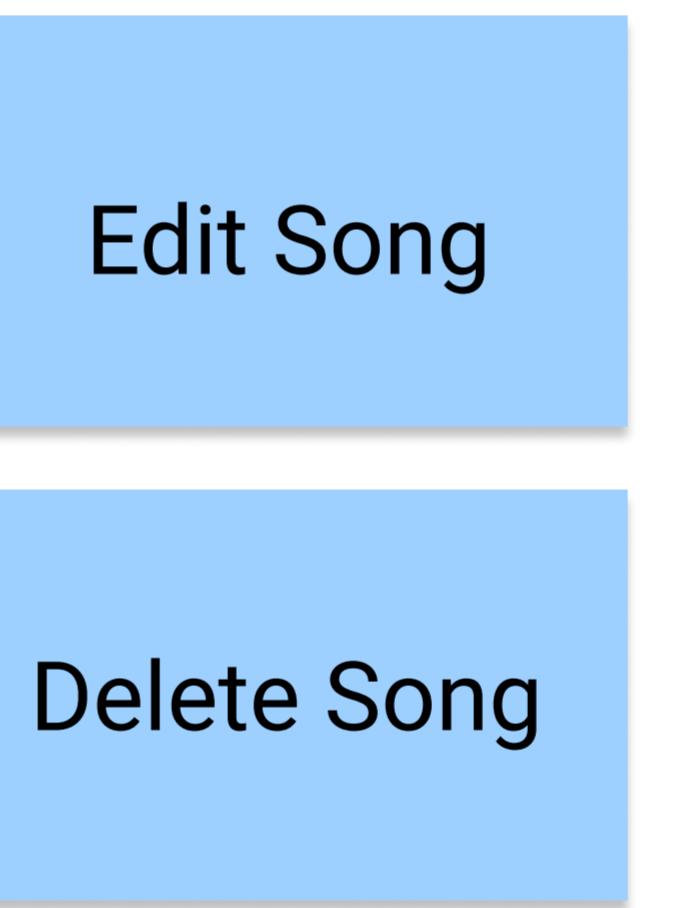

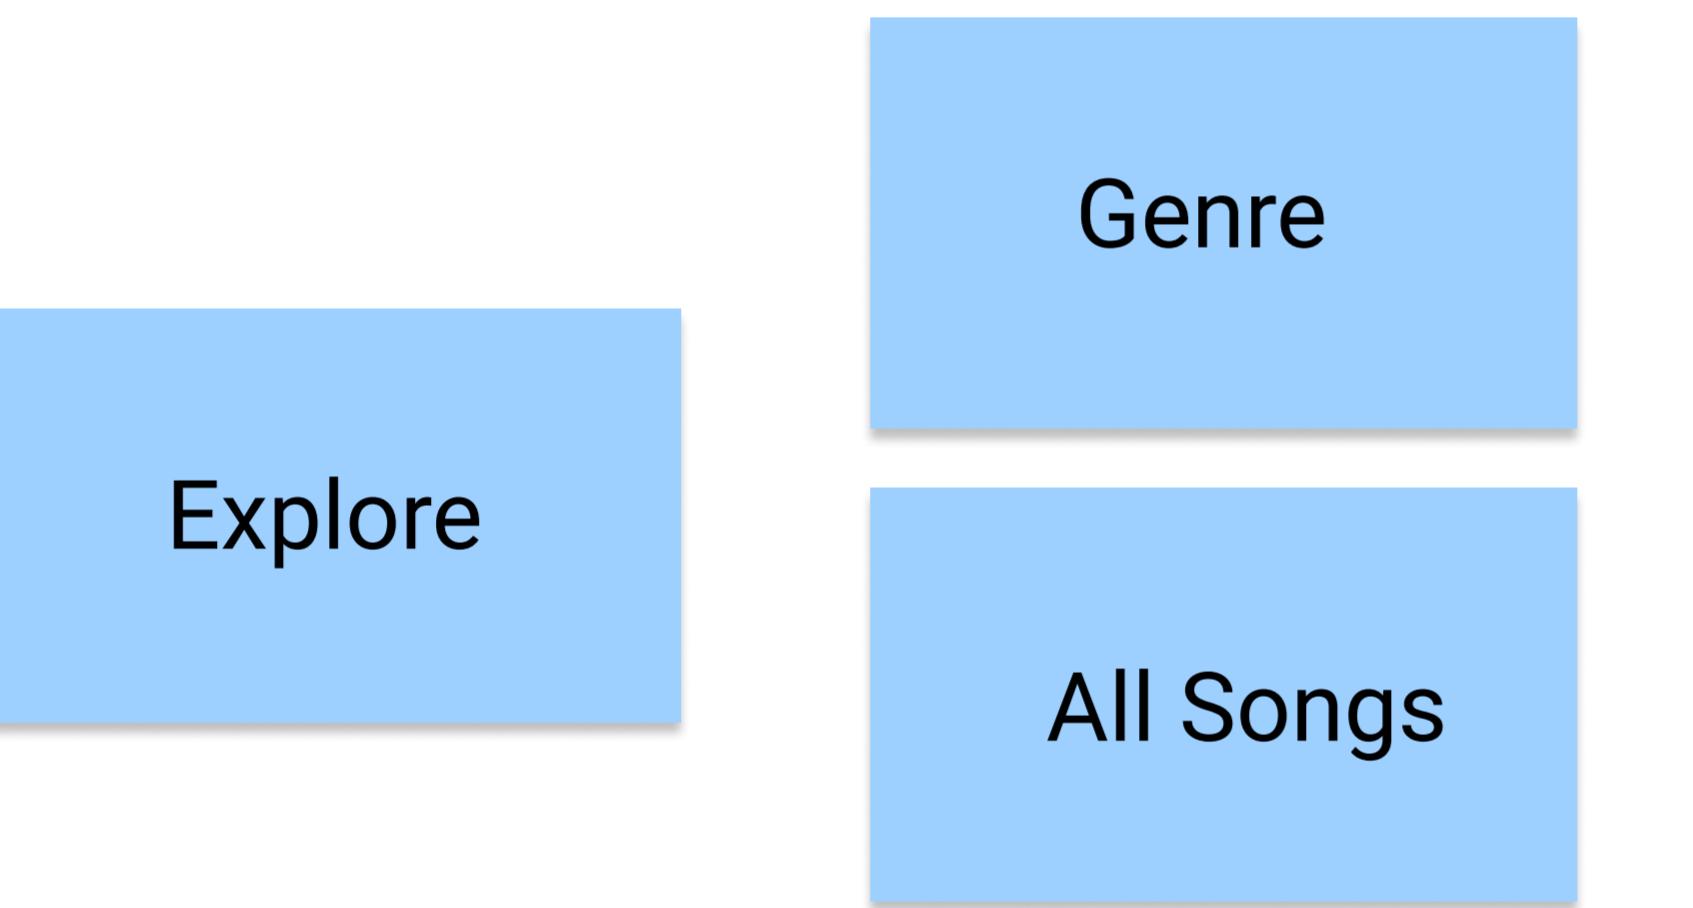

As user, I want to be able to see the types of categories of music so I can narrow down my search for new songs

As user, I want to be able to view more information on a song and listen to it to see if I enjoy it

As a user, I want the ability to make alterations to a song if the information is incorrect, or remove altogether.

As a user, I want to add my own recommendations for other music lovers.
